Crosman® Take It Outside

Crosman/Benjamin Airgun Hunting ***SUGGESTED*** Product Selection

BENJAMIN® AIRGUNS

CENTER POINT HUNTING & OUTDOORS

Hunt responsibly and ethically - know your capability and know your distance!

It is your responsibility to know and understand the local hunting laws and regulations where you plan to hunt.

Recommended kill zone for all species is a head shot

Suggested kill zone is a head shot or other vital area such as double lung or heart

***** Due to its substantial power, the Rogue air rifle is not recommended for use on smaller-sized game.*

THE RANGE AT WHICH GAME MAY BE TAKEN IS DETERMINED BY BALLISTICS AND BY THE ACCURACY OF THE SHOOTER.

We strongly recommend you not shoot at distances farther than your personal accuracy range with any particular gun (ability to hit a American quarter-sized target 10 times out of 10) or range estimate above, whichever is greater.

Shooting at longer distances decreases the chances of a clean kill and increases the chances of wounding the animal - something a true sportsman always attempts to avoid.

This chart is recommended for use in the USA only.

foot pounds of energy = pellet weight in grains x velocity squared / 450,800 (gravity constant)

REV 9.2.11
